MENS CLASSIC™ RIBBED ▶

In both therapeutic and medical grade compression levels, Mens Classic™ Ribbed gives the professional look with the clinically proven compression that provides relief from tired, aching legs, post-sclerotherapy treatment, and chronic venous insufficiencies.

Mens Classic™ Ribbed Indications	
(15-20 mmHg)	Tired, aching legs, mild swelling, mild edema, minor varicose veins.
(20-30 mmHg)	Moderate compression for moderate edema and varicose veins and moderate swelling. Helps prevent the recurrence of venous ulcers.
(30-40 mmHg)	Post-sclerotherapy treatment, chronic venous insufficiency, varicose veins with tendency to edema.

Mens Classic™ Ribbed Availability		
LENGTH	COLORS	TOE
Knee High	Black Tan	Closed Toe

◀ CUSHIONED ACTIVE™

Active lifestyles go better with Cushioned Active™ compression socks for both men & women. While exercising, the continuous graduated compression helps increase blood flow, thus relieving tired, achy legs, swelling, fatigue and varicose veins. This allows you more time to be active while speeding recovery. Cushioned foot with a sock like feel.

Cushion Active™ Indications	
(15-20 mmHg)	Mild therapeutic compression for minor swelling, minor varicose veins, tired, aching legs.
(20-30 mmHg)	Moderate compression for moderate edema and varicose veins and moderate swelling. Helps prevent the recurrence of venous ulcers.

Cushion Active™ Availability		
LENGTH	COLORS	TOE
Knee High	White Black	Closed Toe

SHEER PERFECTION™ ▶

Sheer Perfection™ provides both therapeutic and medical grade compression levels in a high fashion and exceptionally sheer design. Lightweight and breathable, this hosiery is for women who want a great look with the benefit of compression therapy.

Sheer Perfection™ Indications	
(15-20 mmHg)	Tired, aching legs, mild swelling, mild edema, minor varicose veins, helpful in preventing blood clots & DVT.
(20-30 mmHg)	Post-vein surgery, moderate edema, and varicose veins or to prevent varicose veins.

Sheer Perfection™ Availability
